

Chi Yun School (Boarding Section) Influenza A in Dormitory

To whom it may concern,

Centre for Health Protection informs us today that there are two students in dormitory who have infected Influenza A. The doctors of Department of Health suggest that school staff and students can take TAMIFLU for ten days continuously to prevent from the infection. Therefore the doctors from the Department of Health have come to school for the arrangement in the afternoon today. The school nurses have informed all the students' parents or guardians immediately.

The school has reported the cases according to the guide of the Centre for Health Protection and had the medical supervision from today. For the protection of the students and staff's health, the school would continue to strictly implement the intensive prevention measures issued on 10th December, 2018.

All staff and visitors please maintain the alertness to implement the prevention and control measures of infection. If there is any enquiry, please contact the school nurse on duty via the phone number: 23862010.

Yours Faithfully,

Yung Wai Man
Warden
