

Chi Yun School (Dormitory Department)
Upper respiratory tract infection in Dormitory

20th May, 2019

To whom it may concern,

Because all the inflected students have recovered and there is no new case of inflection, Centre for Health Protection informed us today that we has been excluded from medical surveillance.

Effective prevention and control measures depend on everyone's co-operation. We will continue to maintain good personal and environmental hygiene against influenza. Thank you for your attention and cooperation.

Yours faithfully

Yung Wai Man
Warden
